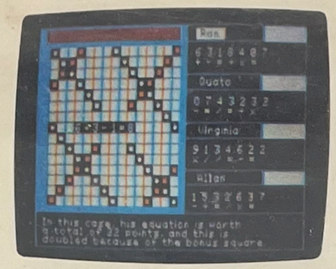
QUATIONS



Mom
Dusty
Virginia
Milton
In this case, his equation is worth a total of 32 points, and this is doubled because of the bonus square.

The math crossword game.

QUATIONS is a fast-paced, fun-packed, brain-straining math game.

You play it just like you play Scrabble®, except you use numbers instead of letters. The computer deals you a hand of seven number tiles and six operation tiles (+, −, ×, ÷).

When your turn comes, you try to form an equation that uses as many of your tiles as possible (for example, 30 + 4 − 2 = 32). Then you have to find a place for it on the computer board.

You can play QUATIONS with your friends or against the computer. But you've got to play extra smart to beat the computer.

Learning Opportunities

QUATIONS provides a familiar board-game environment where children can practice basic math skills. It helps build problem-solving and strategy skills while developing intuitive understanding of mathematical operations.

Contents: 1 disk, 1 handbook, 1 game board, 1 reference card.
